

# DRAINLAB<sup>®</sup> – TILE INSERT

Shadow line design conceals waste void for a clean and minimalist finish.

Angled drain tray for superior water collection and rapid drainage to waste.

When the screed is applied over waterproofing, the side wings facilitate screed penetration, improving the embedment and anchorage of the drain base.

Optional aluminium inserts can be easily inserted to the entire channel length on both sides to create a "U" channel drain base finish.

## TILE INSERT DRAIN AVAILABLE IN 3 HEIGHTS
